

Miu Miu Fall/Winter 2019
Show Space Description

Found Objects / Objets Trouvés

For the FW 2019 Miu Miu show, AMO translates the vibrant work of Sharna Osborne into a three-dimensional collage that explores the power of images through different media. A curated selection of the photographer's personal material provides an intimate angle on femininity that resonates with this year's collection.

The monumental enfilade of the Salle Hypostyle is populated with a jumbled array of images. Giant prints, short video clips, old TVs and LED-screens produce a non-linear visual overload. The installation consists of an arrangement of frames, supports and structures that shape a chaotic ensemble of narratives.

Guests informally blend in the space, along the model path that unfolds playfully through the hall. The catwalk is composed of a series of incidents that confront fashion and image in a vigorous dialogue.
